

REPAIR XL MAINTENANCE STAND

The Repair XL maintenance stand is ideal for carrying out basic repairs such as repairing a puncture to adjusting brakes and gears. The tools are securely attached to the stand with PVC coated stainless steel cables and tamper-proof fasteners. Hanging the bike from the arms allows the pedals and wheels to spin freely whilst making adjustments. It is ideal for train stations, universities and even the high street!

Product dimensions:

W: 260mm

D: 530mm
